

JAVA DEVELOPER

Yogesh S

Objective

As a recent graduate with a Good foundation in front-end technologies combined with proficiency in back-end development using Java and a keen interest in further developing my front-end skills, I'm well-positioned to excel in web development

PROJECTS

LUDO SIMULATION

Ludo Simulation, developed with HTML5, CSS3, and JavaScript, delivers an engaging and interactive web experience.

JOB CONSULTANCY

A job consultancy website developed with HTML5 and CSS3 offers a basic, static web presence. The website serves basic information but may not offer the dynamic features expected in modern job consultancy platforms.

INVENTORY MANAGEMENT SYSTEM

Worked with cross-functional teams, including marketing, product development, and digital, to ensure the effective execution of design projects. see my projects through the provided link below: <https://github.com/Sumuk0902/my-projects>
